Overview

CYBERUK is the UK government's flagship cyber security event.

CYBERUK 2020 will take place at the ICC Wales, Newport on the **19-20th May 2020**.

Hosted by the National Cyber Security Centre (NCSC), CYBERUK features world-class speakers, solutions and opportunities for interaction between the public and private sectors. Briefings include the evolving cyber threat and how we must respond as individuals and as a community to keep Britain safe in cyberspace.

Registration for CYBERUK is not currently open, but to be kept up to date with details about the event, please email cyberuk-events@brayleino.co.uk.

What is CYBERUK?

Attended by over 2500 delegates, CYBERUK is the authoritative event for the UK's cyber security community. It demonstrates what we can do together as teams, as departments and as organisations to deliver a digital Britain that leads the world in cyber resilience.

CYBERUK is an opportunity for the whole cyber security community to meet, discuss business needs, review the changing threat landscape and clarify their responsibilities.

CYBERUK events have a reputation for their energy, informality and ability to break down barriers. Delegates from different sectors have the chance to interact and work together.

Who should attend?

Strategy & Leadership

Community: This event is attended by those with overall responsibility for cyber security in government departments and across central and wider government. There will also be a strong industry presence from across the UK and worldwide.

Cyber Security Professionals:

Attendees will also include technology and cyber security professionals at all levels from across the public sector, CNI and industry. All those who work in technology, digital security,

procurement and data will come together and share the cyber security challenges they all face.

World-class content

The NCSC develops an authoritative programme for CYBERUK. Over the course of this event there are demos, inspirational talks, workshop sessions with world-leading experts and plenty of opportunity for discussion and debate. CYBERUK features innovative approaches to security that are making a real difference to the services and infrastructure we rely on.

Content shaped for participants

CYBERUK content is shaped to the requirements of participants. There will be sessions on strategy, governance and the responsibilities facing information risk owners. Technical sessions will be provided for technology and cyber security professionals. Further briefings will be relevant for both senior information security leaders and professionals, allowing them to work together and consider problems from different perspectives.

Plenary sessions

The plenary speaker line-up comprises of world-class cyber security experts, who set the scene, sharing personal insights and responding to emerging perspectives from across

the event. Keynotes will be short and designed to have high impact, sparking debate and feedback.

Fully inclusive

The NCSC is committed to ensuring CYBERUK events are inclusive to all so that all delegates can enjoy the same experience. We ensure all participants have access to all elements of the agenda and that they are able to enjoy all presentations and content.

Audience-centred streams

Following plenary sessions, delegates are offered content-rich Streams, encouraging active audience participation.

Truly interactive

Every facet of CYBERUK is designed to encourage debate, input and feedback. We are determined to give delegates a real opportunity to have their say. We use the Sli.do platform for live engagement, enabling the audience to submit questions using their own devices. Included are interactive zones and many

opportunities for attendees to voice their thoughts, including feedback walls and stations.

Welcome drinks

To set the tone for the event, there is a Welcome Drinks reception, the eve of CYBERUK, for the professionals' community to meet and network in a relaxed environment.

Leaders dinner

There is a formal networking dinner for the leadership community, bringing together individuals responsible for setting the cyber security strategy across government and industry.

Networking evening

Relaxed networking is a trademark of CYBERUK events and the informal networking evening kick starts this. This will feature thought-provoking talks, live music and refreshments. This will be an opportunity for individuals across the cyber security community to relax, meet and establish new contacts.

Specialist exhibition —

There will be a wealth of national cyber security specialists and international guests providing a relevant, tailored exhibition. This will be designed and located to ensure it maximises networking opportunities throughout the event and during the networking evening.

Spotlight stage —

An event highlight will be the Spotlight Stage, featuring thought-provoking lightning talks. These will be held during the refreshment breaks. They will provide a concise briefing on key topics, latest innovations and pioneering ideas.

CYBERUK Games —

NCSC technical experts and industry partners will again create a series of entertaining technical challenges for participants at CYBERUK. The challenges are tailored to every skill level.

Cyber Den —

CYBERUK includes the Cyber Den, which is presented in partnership with the Department for Digital, Culture, Media and Sport (DCMS). Here cyber security entrepreneurs have the chance to pitch their products to a panel of NCSC Technical Directors and industry leaders. This will identify and recognise the best new solutions.
